The Supreme Court decided in favor of abortion in 1973 stating that they could not determine whether or not a fetus was a person and therefore the unborn could not be guaranteed the rights of "We the people" as begins the Declaration of Independence.

*And it happened,
when Elizabeth heard
the greeting of Mary
that the babe leaped
in her womb; and
Elizabeth was filled
with the Holy Spirit.*

Luke 1: 41

Heavenly Father,
what other evidence
should anyone need
to prove that a fetus
is a person! As a
fetus, John felt such
joy to be in the
presence of Your Son,
Our Lord Jesus, that
he jumped for joy!
Grant us the means to
overturn Roe v Wade
and Doe v Bolton,
which legalized
abortion during all 9
months of pregnancy
for any reason. Amen.

As founder of NARAL, the National Association for the Repeal of the Abortion Laws, ex-abortionist Dr. Bernard Nathanson outlines the strategy NARAL used to convince the US Supreme Court to issue the decisions that legalized abortion on demand in 1973.

NARAL repeatedly fed lies to the media. NARAL advertised fictional polls stating 60% of Americans were in favor of permissive abortion. NARAL inflated the number of yearly illegal abortions from less than 100,000 to 1 million and the number of deaths from illegal abortions from 200-250 per year to 10,000.

NARAL insisted that the "definition of when life begins is impossible; that the question is a theological or moral or philosophical one, anything but a scientific one." NARAL wanted to make it debatable and therefore a citizen's right to believe what he wants to.

Dr. Bernard Nathanson ends by admitting that the motivation was purely for money and this statement:

**"AS A SCIENTIST I KNOW, NOT BELIEVE, KNOW
THAT HUMAN LIFE BEGINS AT CONCEPTION"**
