

Florida Right To Life

Defending Human Life

Since 1971

What is FRTL PAC?

It was through the law that the systematic legal slaughter of 1.6 million children annually by abortion in the United States began. It is through the law that it will stop. Florida Right to Life's Political Action Committee is working toward that end. Our ultimate goal is a Human Life Amendment to the Florida and U.S. Constitutions.

This will make possible legal protection for all human beings. While working toward this goal, we promote and support other positive legislation to improve and protect human life. This legislation will only crystallize if pro-life legislators are elected at the local, state and federal level.

FRTL PAC is the largest pro-life PAC in the state. It consistently delivers the votes necessary to elect pro-life men and women to federal and state government. FRTL PAC educates candidates on the issues of abortion, infanticide, and euthanasia. It can help pro-life candidates to clearly articulate their position on the issues and can provide information for the candidate.

In preparation for upcoming important elections Florida Right Life PAC does various efforts such as:

- * A Questionnaire is mailed to Federal & State Candidates.
- * Prioritize races in which to get involved.
- * Set-up phone banks in targeted races to encourage identified pro-life homes to get out and vote for our candidates.
- * Coordinate advertisements on television, radio, and print.
- * Coordinate distribution of literature.
- * Publish Endorsements.

These efforts and many others are necessary to elect the candidates that will enable us not only to pass protective pro-life legislation, but also to defeat pro-abortion and pro-euthanasia measures introduced in the legislature.
