suffering from the affects of an abortion.

For too long, abortion has been considered as only a women's issue. But for the men of lost fatherhood, that is not the truth. For every woman affected by abortion, there is also a man; both equal parents to the aborted child. As we begin to study the impact of lost fatherhood upon a man, most telling are their testimonies.

No doubt an unwanted pregnancy can cause intense stress and hardship in a variety of ways, but, the medical evidence is clear -- the physical and psychological consequences of abortion can be far worse. Nine short months of pregnancy is a relatively small cost to pay in light of a lifetime of potential physical and mental health problems. How many women, and men, wish they could turn back the clock of time to save themselves from the agony of having an abortion?

There is no reason why any woman should go through surgery of any kind, including abortion or taking powerful drugs that induce abortion, and not be informed of the potentially serious side effects. Pro-Woman is helping women <u>make an informed choice</u>. How ironic that Pro-Choice isn't Informed-Choice!

The latest statistics show that 64% of abortions are coerced!
