

Hi,

My name is Janet Creighton and I belong to the Bedford County Citizens Concerned for Human Life in PA. The president had asked me to put together a video of 4D Ultrasound images to play at the fair and other places where we have a table set up. I found incompatible formats and a lack of equipment to do the job. In response to an email, a lady named Marilyn from Wilmington, NC sent me a DVD! The local video guy, Mike Phillips was able to put some nice music to it and so I now have this video to share with other pro-life groups.

There is a 6 minute or so commercial at the beginning, which I left on because it is informative and was nicely done as an interview. Then there is 32 minutes or so of 4D Ultrasound video put to gentle music. The VHS tape is looped so that it plays through about 3 ½ times. If you are interested in purchasing a copy for your group, just fill out the order form below and send it along with the proper amount.

In addition to doing whatever I can to help out our local chapter, I have a special ministry in setting up websites for pro-life chapters to help get the pro-life message out to the people in their counties. I do not charge anything for setting up a pro-life website. Hosting and domain name registration is \$126 yearly. Your group gets a user name and password to make changes. Check out my local chapter's website at www.bedfordcountyprolife.org.

For more information on the video or a website, contact me at 814-623-1314.

May Our Lord's Peace Be With You,

Jan
